

**The Corkery Community Association
&
The City of Ottawa Recreation Department
Joint Survey**

The Corkery Community Association and the City of Ottawa Recreation Department are working together to survey the residents and association members to assess the current and future recreational needs of our community.

Please note that the survey is divided into three sections.

CURRENT NEEDS - In the first section, we are seeking your input to assist us in planning for activities in and around the community centre as it currently exists.

FUTURE NEEDS - In the second section, we are seeking your input as to what activities you would like to see at the Centre, assuming that the building is expanded to twice its current size. The Community Association will be putting forth a proposal to the City within the year to enclose the patio area. Assuming that this proposal is approved by the City, this expansion will give us another room and double the size of the Centre.

COMMUNITY INVOLVEMENT - The Corkery Community Association is a dynamic group of volunteers. In order to both continue to offer the current activities and to expand our Centre, we will be looking to you, our neighbours, for your input and assistance.

Please take time to fill out the form by either circling choices or adding comments in the following questions to help us provide future direction in our recreational planning.
